## Open Source Hardware

Arduino, Open Source Hardware

Arduino, Open Source Hardware

The screenshot shows the 'Jobs at Apple' page. The main heading is 'Look for a job in Corporate.' Below this, there are sections for 'Qualifications' and 'Nice to have experience with'. A text box with a black arrow pointing to it contains the text: '- electronics (Arduino, Make Controller, Phidgets, microcontrollers, sensors, etc.)'. This text is also listed under the 'Nice to have experience with' section on the page.

Jobs at Apple

Welcome Corporate Retail [Start your search](#)

Look for a job in Corporate.

Qualifications

A portfolio of innovative designs, with working prototypes or implementations

Possible degrees / backgrounds:  
Human-Computer Interaction, Interaction Design, Graphic Design, Industrial Design, Ad, Computer Science, or Electrical Engineering

- electronics (Arduino, Make Controller, Phidgets, microcontrollers, sensors, etc.)

Nice to have experience with:

- designing multi-touch interfaces
- electronics (Arduino, Make Controller, Phidgets, microcontrollers, sensors, etc.)
- rapid prototyping (hand tools, plastic, cardboard, 3D printing, laser cutter, etc.)
- 3D graphics, motion graphics, traditional or special effects animation
- signal processing (simple filters, thresholds, basic heuristics, etc.)

Arduino, Open Source Hardware

Установена като de facto стандарт за  
прототипиране, а и за цялостни,  
завършени решения

Имате нужда от помощ – попаднали сте сред най-голямата, активна и толерантна общност, която се занимава с хардуер:  
<http://arduino.cc>

Комуникация с РС  
Комуникация с други Arduino-та  
Управление на LCD  
Механични устройства, играчки  
Автомобили и мотори  
Двигатели  
Превключватели  
Светлини

Защо не евтин (\$10?!) компютър с Линукс?  
Защото 90% от времето за разработка  
отива за настройка на OS-а, а не за  
самото решение.

След ардуиното накъде?
